## Baseboard Heater

### Applications

- Offices
- Restrooms
- Retail Stores
- Restaurants

The 903 Series baseboard heater is more compact than any other heater on the market, yet it provides a high level of performance and strength. The unit's trim design enhances its appearance and rounded corners eliminate the sharp edges found on square heaters.

- **Easy to Install:** Heaters may be mounted flush on any floor surface. Two rows of oblong mounting holes with center mark for ease of installation. No disassembly installation with single-screw built-in rear entry wire holder.
- **Electric Receptacles:** Units can be furnished with built-on 120 and 240-volt receptacles to provide access for other electrical appliances.
- **Control Options:** Heaters can be controlled by a building management system with the addition of a low voltage relay. Adding a proportional control device provides precise temperature control and increased energy savings.

## Standard Construction Features

**Heating Elements** – Stainless steel elements with aluminum fins float on high temperature nylon bushings for quiet operation.

**Housing** – Robust 22-gauge steel body with 20-gauge front panel and welded junction box, with 4H pencil hardness epoxy/polyester powder paint finish in white or almond.

**Built-in Controls** – Linear limit, automatic reset thermal cutout.
